Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamate et al (2003/0234921).

With respect to claim 25, Yamate discloses an apparatus for detecting Bragg grating 40 (fig 2) reflected and backscattered signals 22 (fig 1). The apparatus comprises: a laser tunable 30 (fig 2) (paragraph [0043]), an optical cable 36 (fig 2) coupled to the laser, a Bragg grating sensor 40 (fig 2), a plurality of sensors (paragraph [0052]) are disposed within a single interrogator 32 or 28 (fig 2) (paragraph [0046]).

Yamate does not explicitly disclose the claimed point sensing circuit and distributed sensing circuit. Since applicant does not explicitly claim the function of the sensing circuits, it would have been obvious that Yamate's sensors could be called a point sensing circuit and a distributed sensing circuit.

With respect to claim 26, Yamate discloses using a large diameter optical waveguide (paragraph [0045]).

With respect to claim 27, Yamate discloses an optical fiber Bragg grating sensor (paragraph [0045]).

Allowable Subject Matter

Claims 1-24 are allowed.

Claims 1-24 are allowed for reasons of arguments presented by the applicant in the amendment letter received on 03/09/2006.

Response to Arguments

Applicant's arguments filed 03/09/2006 have been fully considered but they are not persuasive.

With respect to Applicant's argument on claim 25-27, refer to discussion above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2877

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
